Golf Simulator

Summary of Lynx Golf Technology

EET - Effective Energy Transfer. A device (system) unique to Lynx that is present on the inner surface behind the striking face of a golf club that disperses energy effectively across the hitting area offering greater forgiveness on off-centre hits. EET will also help to maintain a consistent ball flight off the driver face.

ALP - Adjustable Lie Putter. This allows the player to adjust the hosel angle from 68°-76°, making the putter face flatter or more upright to suit the players preferred putting stroke.

COG - Centre-of-Gravity. The lower the center-of-gravity and the further back the center of gravity is from the face of the club, the higher the trajectory of the shot will be for any given loft angle on the club head. In the Lynx COG Putter, moving the center-of-gravity weight higher will increase stability at impact and improve forward momentum of the golf ball giving for a more consistent roll.

TST - Twin Slot Technology. The first slot behind the club face distributes weight evenly around the hitting surface – generating immense(unrivalled) forgiveness. The second slot creates a further 'power pocket', propelling the ball off the face hotter (faster) than any other iron(s).

CCT - Ceramic Core Technology. Exclusive Lynx process used to develop Twin Slot Technology from a "one piece" constructed iron head. This gives a higher flight with a more consistent performance on all shots from any lie.

WBS - Weight Bar System. Reversible weight bar on the sole which means the player can reposition weight to the front or back of the club head. By repositioning this weight, it gives the player ultimate control over their preferred launch angles and ball spin - giving more control and accuracy.

PFT – Progressive Face Thickness. Enables weight to be distributed around the club face giving maximum performance on all off center hits.

MOI - Moment of Inertia. MOI is the term applied to any object's resistance to twisting around an axis. In golf, the term is usually applied to club heads, but can also be applied to golf balls and even shafts. In terms of the club head, one with a higher MOI will be more resistant to twisting than one with a lower MOI. A club with a high-MOI will twist less on off centre shots minimizing the effects of the mis-hit on the flight of the golf ball.

#BB
IRONS

Features:

- 17-4 Stainless Steel (#BB Tour 304 Stainless Steel)
- Twin Slot Technology (TST)
- One-Piece Stainless Steel casting
- Ceramic Core Technology (CCT)
- Progressive Face Thickness (PFT)
- Full custom fit

Irons options:

- #BB Iron 5-PW (4i + AW available), Men's RH
- #BB Offset 5-PW (4i + AW available), Men's RH
- #BB Tour 4-PW (3i available), Men's RH

Std steel shaft: KBS® Tour
Flex: Regular/stiff

Std graphite shaft:

BLACK CAT DRIVER

Features:

- 460cc Head 2 piece titanium
- Matt crown finish
- Cup face technology with face hardening treatment applied - for faster ball speeds and less spin
- EET - Effective Energy Transfer enlarges and improves the sweet spot and forgiveness
- Weight Bar System allows the player to put more weight at the front or back to enhance the flight characteristics for reduced ball spin and launch trajectory
- Full custom fit

Driver options:

- Fully adjustable (8.5°-12.5°)
- Men's RH

Std graphite shaft:

Lynx Black Cat Graphite
Flex: Lite/Regular/Stiff

Optional graphite shaft:

Graffaloy® ProLaunch Blue
Flex: Lite/Regular/Stiff/XStiff

Optional graphite shaft:

Graffaloy® ProLaunch Red
Flex: Regular/Stiff

BLACK CAT
FAIRWAY WOOD

Features:
- Matt crown finish
- Two-piece cup face technology with face hardening treatment applied –for faster ball speeds and less spin
- EET - Effective Energy Transfer enlarges and improves the sweet spot and forgiveness
- Weight Bar System allows the player to put more weight at the front or back to enhance the flight characteristics for reduced ball spin and launch trajectory

Fairway wood options:
- Fully adjustable (13°-17°)
- Men's RH

Std graphite shaft:
Lynx Black Cat Graphite
Flex: Lite/Regular/Stiff

Optional graphite shaft:
Graffaloy® ProLaunch Blue
Flex: Lite/Regular/Stiff/X-Stiff

Optional graphite shaft:
Graffaloy® ProLaunch Red

PREDATOR
DRIVERS

Features:
- 460cc Forged titanium head
- Fully adjustable 9°-12° degrees with draw bias settings
- Large forgiving head that aids off-centre hits
- Colour co-ordinated alignment design
- Full custom fit

Driver options:
- Fully adjustable (9°-12°)
- Men's RH

Std graphite shaft: Lynx Predator Graphite
Flex: Lite/Regular/Stiff

PREDATOR
FAIRWAY WOODS

Features:
- Stainless steel design
- Low profile head shape makes them easy to hit from tight lies
- High launching for improved distance and control
- Colour co-ordinated alignment design
- Full custom fit

Fairway wood options:
- 3 (15°) and 5 (19°) FW
- Men's RH

Std graphite shaft: Lynx Predator Graphite
Flex: Lite/Regular/Stiff

PREDATOR
HYBRIDS

Features:
- Stainless steel design
- Low profile head shape makes them easy to hit from all types of lies
- High launching for improved distance and control

LYNX PUTTERS

LYNX MASTER MODEL

Features:

- One-piece computer milled construction
- Toe/heel weighted putter
- CNC milled face
- Unique crystal alignment aid
- Custom fit available
- Full custom grip options available

COG Putter

Features:

- Adjustable weight block to shift COG - Centre Of Gravity
- Custom design CNC milled face
- Easy alignment
- Custom fit available
- Full custom grip options available

ALP Putter

Features:

- Adjustable lie angles from 68° to 76°
- Special lie adjustment key
- Easy alignment
- Custom fit available
- Full custom grip options available

SWASH
PUTTERS

Features:

- Pyramid Groove Design™
- Pyramid Alignment System™
- 3mm wide gold alignment stripe
- **Rameses** super-mallet style putter
- **Memphis** mallet style putter
- **Isis** blade style putter
- **Luxor** blade style putter
- Matt black finish

Putter options:

- Custom fit available
- Full custom grip options available

FREE OF CHARGE Custom Fitting Carts

WHEN CUSTOM FITTING BECOMES AFFORDABLE – by LYNX

In 2016 Lynx Golf introduced their first Custom Fitting Carts into the UK market because we recognised the importance of fitting golfers with the right equipment. These carts have already proved to be the 'Hot Ticket' with our accounts, so as a result of this Lynx Golf has invested further significant funds to make another 300 fitting carts available to help support our customers in line with our anticipated sales growth both in the UK and Europe.

These carts are supplied FREE OF CHARGE and carry a full and comprehensive range of current Lynx woods and irons to suit all ability levels of golfers. We even offer full custom fit options on our Predator range which has a RRP of £199.00. Included in the fitting cart are the new #BB woods and irons, the new Black Cat woods and irons and the new Parallax woods and irons, all exciting new products being launched by Lynx Golf for 2017.

We want to give your customers a total fitting experience, so we also supply an extensive range of Steel and Graphite shafts from some of the top shaft companies like True Temper®, KBS®, Graffaloy® and Aldila®. The cart also includes a lie board, a measure and technical information to give you everything you need to carry out a full fitting experience for your customers.

Our business is built on delivering exceptional service to our customers and as part of becoming a Lynx fitting Centre (which your cart will qualify you for) we will offer at least one Demo Day carried out by one of our three UK Custom Fit Experts. They also offer full product training for you and your staff.

We fully recognise the importance of meeting your consumer's expectations as well and in 2016 our average build time from receipt of order to delivery of built product has been no longer than three to four days.

If you want to become part of the fastest growing brand in the UK and would like more information about becoming a Lynx fitting Centre, then why not give our Team a call on 01932 344074 or alternatively speak to your local Lynx Area Sales Manager.

LYNX GOLF SWING SIMULATOR

GC2 Smart Camera System

Indoors, GC2 continues to provide the most accurate ball launch data allowing you to custom fit and analyse with trusted results.
Most in-demand technology in golf, has revolutionised club fitting and analysis. Consistently outperforms the industry's most trusted ball flight measurement technologies. Complete club performance analysis delivered real-time using FR1 Performance Simulation.
